Systems engineer based in Colombia with a focus on user experience research and applied machine learning

Experience

UX Research Intern · **Universidad del Magdalena** Dec 2025 — May 2026

- Led research and redesign of the academic scheduling system, improving usability and accessibility for 30+ programs and 14k+ students; achieved a SUS score of 81 (*vs ~68 industry avg*).
- Audited WCAG 2.1 compliance using WAVE, Lighthouse, and Accessibility Insights; prioritising critical barriers through heuristic evaluation and benchmarking against peer platforms for program coordinators.
- Built 10+ high-fidelity interactive Figma prototypes with a reusable design system, tested with real users.

Freelance Web Developer · **RD INGINOVA** Feb 2025 — Jun 2025

- Shipped a civil engineering firm's first corporate website using Next.js, TypeScript, React, and Tailwind CSS; reaching 99+ Lighthouse scores across Performance, Accessibility, and SEO.
- Integrated Decap CMS with Cloudinary, keeping content updates under 2 minutes for stakeholders.

Education

Bachelor in Systems Engineering · **Universidad del Magdalena** Sep 2026

Honours: Meritorious Research Thesis recognised for outstanding rigour, leadership and communication skills.

Projects

Wade · **AI assistant with mechanistic interpretability** *In progress*

Designed the UI for a desktop agent that surfaces suggestions based on system context. Scoping a research direction on whether verbalisable states can optimise interruptions, as an alternative to black-box LLM heuristics.

Mangifera · **AI models to classify mango ripeness** github.com/dejesusbg/mangifera

Built computer vision models to classify mango ripeness on 2,714 images, applying hyper-parameter search, cross-validation, and data augmentation to achieve 95%+ accuracy.

Truenavi · **Navigation app for blind people** github.com/dejesusbg/truenavi

Led a 4-person team building a voice-controlled navigation app for visually impaired users on campus, achieving sub-400ms latency through NoSQL geospatial optimisations.

Skills

User Experience	Figma, WAVE, Lighthouse, SUS, heuristic evaluation, usability testing, user research
Artificial Intelligence	Python, TensorFlow, NumPy, Claude Code, FastAPI, scikit-learn, pandas
Development	TypeScript, React, Node.js, Next.js, Rust, Docker, MongoDB, Git, Tailwind CSS
